

CASE STUDY

St. Charles Parish Hospital Education Training Center

Luling, Louisiana

www.taschinc.com

THE GOAL

St. Charles Parish Hospital needed to transform an existing, active area into a modern, fully equipped training facility—without disrupting adjacent critical operations, including the emergency department, which remained in full use throughout construction. The hospital required a space that could support ongoing staff development, simulations, and administrative training while reflecting the high standards of care and professionalism associated with their healthcare environment.

To achieve this, Tasch Construction carefully planned and executed a complete interior renovation that included new HVAC, electrical, and plumbing systems to support the specialized demands of a hospital training space. The finished facility features custom millwork, dedicated workstations, and flexible conference areas, all designed to promote collaboration, functionality, and long-term adaptability.

PROJECT OVERVIEW

Industry: Healthcare

Architect: AQ Studios

**Mechanical, Electrical, and Plumbing
Engineer:**
YKH Consulting

Key Deliverables: Electrical, HVAC,
plumbing, restrooms, flooring, paint, ceilings,
millwork, doors & hardware, infection control,
and life safety

Budget: \$1,047,000

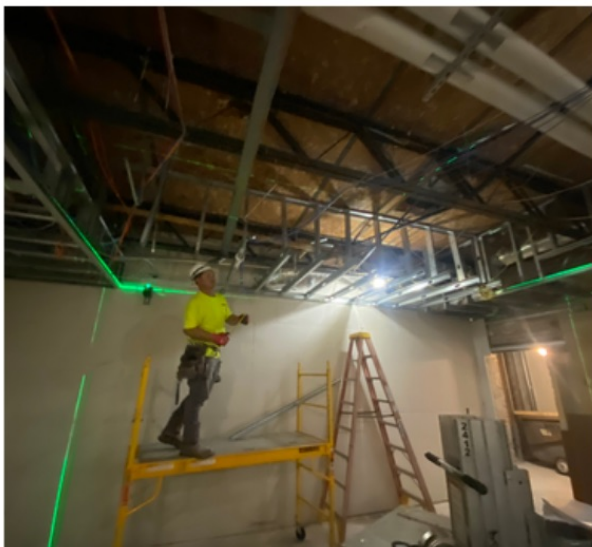

Time Line: 180 Days

DESIGN

The design of the new training facility at SCPH focused on creating a professional, functional space that supports collaboration, learning, and adaptability. Clean lines, durable materials, and thoughtful lighting were used to reflect the clinical environment while maintaining a welcoming atmosphere.

Custom millwork and workstations were tailored to meet the specific needs of hospital staff, while conference areas were designed with flexibility in mind to accommodate both large group sessions and smaller breakout discussions. Acoustic considerations and layout planning helped ensure privacy and minimal disruption to the adjacent emergency department.

COURSE OF CONSTRUCTION

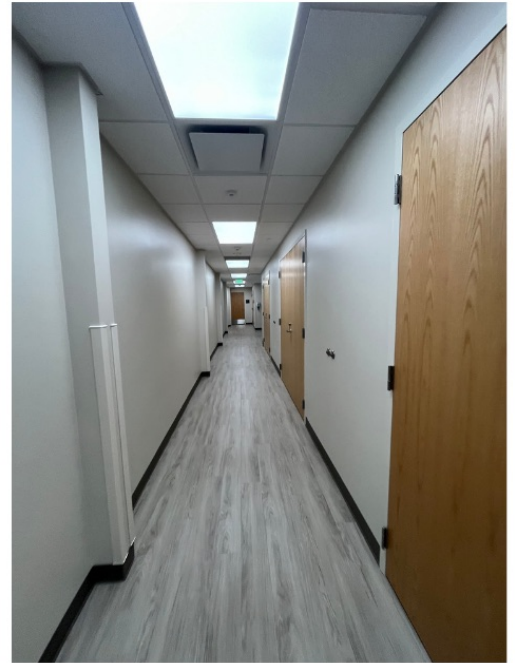

DELIVERED

A fully renovated training facility designed for collaboration, functionality, and flexibility, just steps from the active ER.
